## **Course Description:**

The scientific process involves crafting theories, deriving predictions from said theories, and then testing the hypotheses using data. The skills critical in this process extend into real-life business problem-solving. This course is an introduction to spreadsheets, which are now ubiquitous in our everyday life. Spreadsheets can be used in various fields in real-world businesses, such as data analysis at the operations level, forecasting for marketing purposes, and reporting in accounting or finance departments.

## **Office Hours:**

Regular walk-in office hours will be held on Mondays, Wednesdays, and Fridays from 11:00 AM to 12:30 PM in CSB 248. In addition to these designated hours, appointments can be arranged through <https://calendly.com/brianhwpark>. Students may select 30-minute time slots for appointments, and booking consecutive sessions is allowed. If these options are not suitable, students are encouraged to contact the instructor via email.

## **Textbook & Reading Material:**

There is no textbook required for this course, as the instructor will be assigning material based on each lecture / week's topic.

## **Course Engagement Expectations:**

On average, students should expect to dedicate 8 hours of their time each week to BUSI 201, including the 4 hours of class time. The remaining 4 hours outside the classroom would be spent primarily working on homework assignments, reviewing lecture notes, and preparing for quizzes and/or the final exam.

## **Learning Objectives:**

Upon completing this course, the students will be able to;

1. Import, clean, and analyze large datasets using spreadsheets.
