Course Description:

This course builds upon ECON 200, Principles of Economics, with a focus on a rigorous analysis of modern microeconomic theory pertaining to the behavior of firms and individuals. We will review and expand upon the concepts of supply, demand, and the resulting market equilibrium. Subsequently, we will delve deeper into the demand side by examining how consumers make decisions that contribute to the formation of the demand curve. Naturally, the next step involves analyzing the decisions made by producers and firms, along with their production choices that give rise to the supply curve. In the remaining weeks of the term, the course is dedicated to examining market structures, government intervention, and market failures.

Office Hours:

Regular walk-in office hours will take place every Tuesdays and Thursdays, from 10:30 AM to 12:00 PM at CSB 248. In addition to these fixed hours, you can also schedule appointments through <https://calendly.com/brianhwpark>. Students have the option to book appointments in 30-minute intervals, and booking consecutive sessions is allowed. Appointments can be scheduled up to 15 calendar days in advance. If these options are not suitable, students are encouraged to reach out via email.

Textbook & Reading Material:

While there is no strictly required textbook for this course, the instructor recommends the following as a point of reference. The 9th edition is the most recent version, but older copies will also serve as suitable substitutes.

- Varian, H. R., *Intermediate Microeconomics: A Modern Approach*, 9th Edition, Norton, W. W. & Company, Inc.

Learning Objectives:

Upon completing this course, the students will be able to;

1. Understand the basic framework that models consumer and producer behavior.
2. Analyze social issues with the framework of economists.
3. Apply economic concepts and framework to evaluate real world situations.

Course Engagement Expectations:

On average, students should expect to dedicate 9 hours of their time each week to ECON 300, including the 3 hours of class time. The remaining 6 hours outside the classroom would primarily be spent reviewing lecture notes, completing homework assignments, occasionally drafting short essays, and reading the recommended textbook.
